

IMPORTANT UPDATE

Since 1999, the Illinois Clean Energy Community Foundation has supported programs that improve energy efficiency, advance the development and use of renewable energy resources, and protect natural areas and wildlife habitat in communities across Illinois. The Foundation is proud of the positive impact it has had over the last 24 years. **Currently, the Foundation is not accepting applications for new grants.** All approved grants will be funded subject to the provisions of the grant agreement. The Foundation will provide additional information regarding its future activities in the coming months.

- *The Foundation is now evaluating options for how to best achieve its objectives going forward*
- *No new grant applications will be accepted*
- *All currently approved grants will be funded*
- *Further information regarding the Foundation's future activities will be provided in the coming months*
